Customers & Partners

Agenda

- Data Warehousing & Business Intelligence
- Enterprise BI
- Self-Service BI
- The Microsoft BI & Data Warehouse Toolset
- Demo:
 - Integration Services
 - Analysis Services
 - Reporting Services
 - PowerPivot
 - Power View
 - Power Map

A black and white photograph of a man in a dark pinstriped suit and tie, leaning forward and shouting into a white megaphone. He is looking towards the right. In the bottom right corner, the head and shoulders of a woman are visible, looking up at the man with a slightly exasperated or questioning expression. The background is a plain, light-colored wall.

Manager:
Where are my TPS reports?

Developer:
They are still running since yesterday.

What is:

- Data Warehouse?
- Business Intelligence ?

Terms and Acronyms

- BI: Business Intelligence
- ETL: Extract, Transform & Load
- DW: Data Warehouse
- KPI: Key Performance Indicator
- Fact: A business measurement
- Measure: A quantifiable business process
- Dimension: Breakdown measures according to an area of interest
- Attribute: Characteristics that makeup a dimension member
- OLTP: On-Line Transactional Processing
- OLAP: On-Line Analytical Processing
- Cube: Data structure that groups measures, dimensions, KPIs, data mining models, perspectives
- Metadata: Data about data
- Granularity: Level of detail or summarization of the data
- SCD: Slowly Changing Dimensions
- Alternate Key: Unique key from data source
- Surrogate Key: Unique key in the data warehouse

Data Warehouse

A data warehouse is a central repository for all or significant parts of the data that an enterprise's various business systems collect.

- Bill Inmon

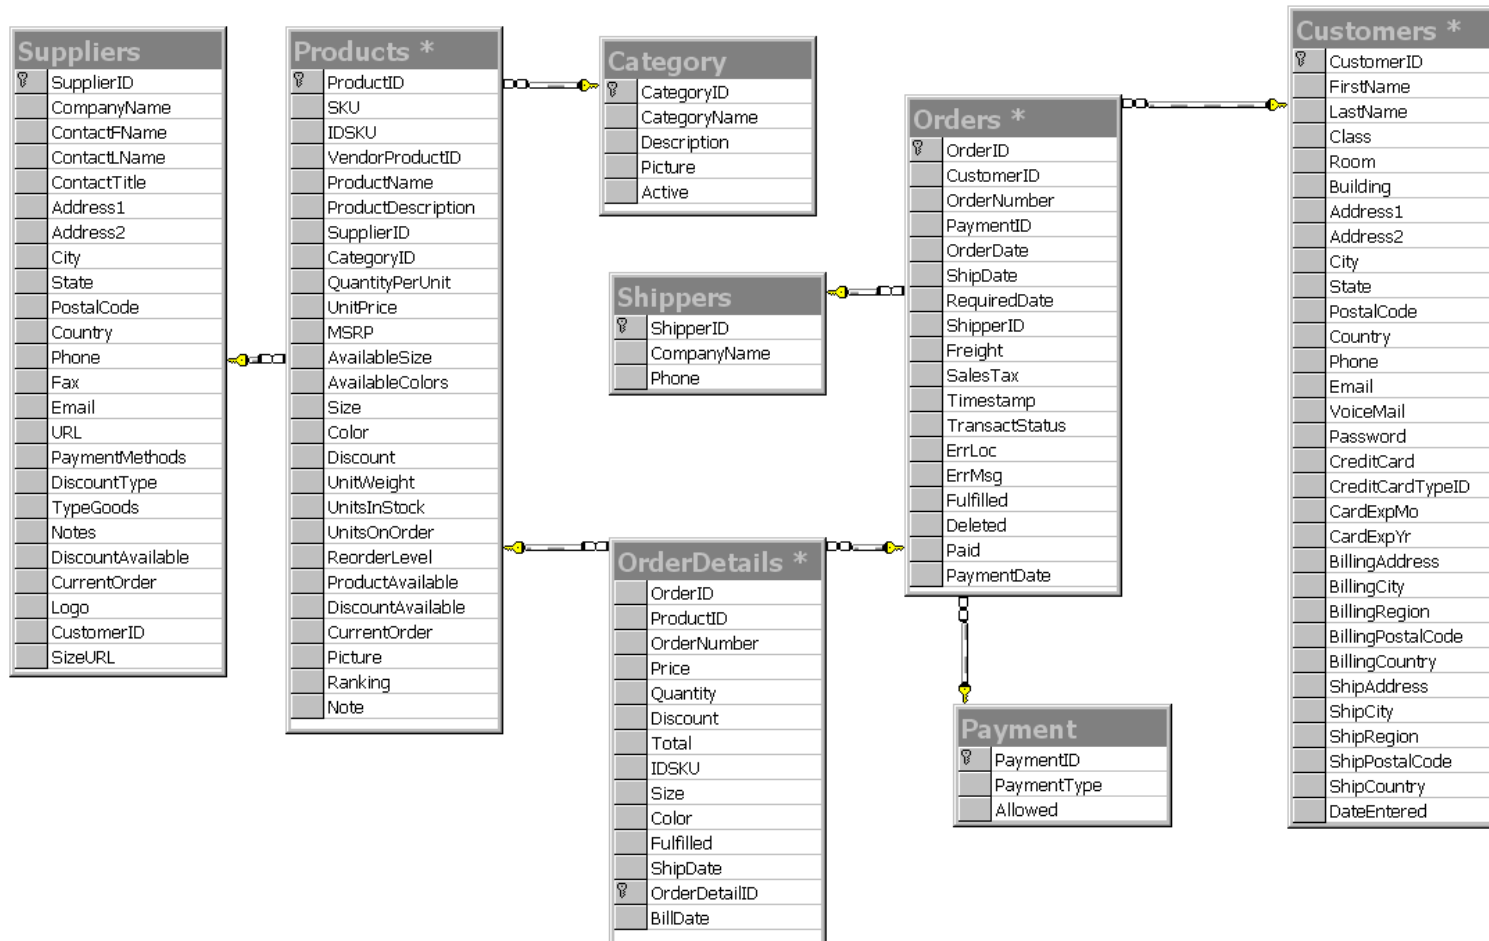

A data warehouse is a central repository for all or significant parts of the data that an enterprise's various business systems collect.

- Bill Inmon

Data Warehouse:

Central repository for all significant data that an enterprise collects.

Small OLTP database

Business Issue:

A customer's order was seriously delayed.

Manager: Why was the order delayed?

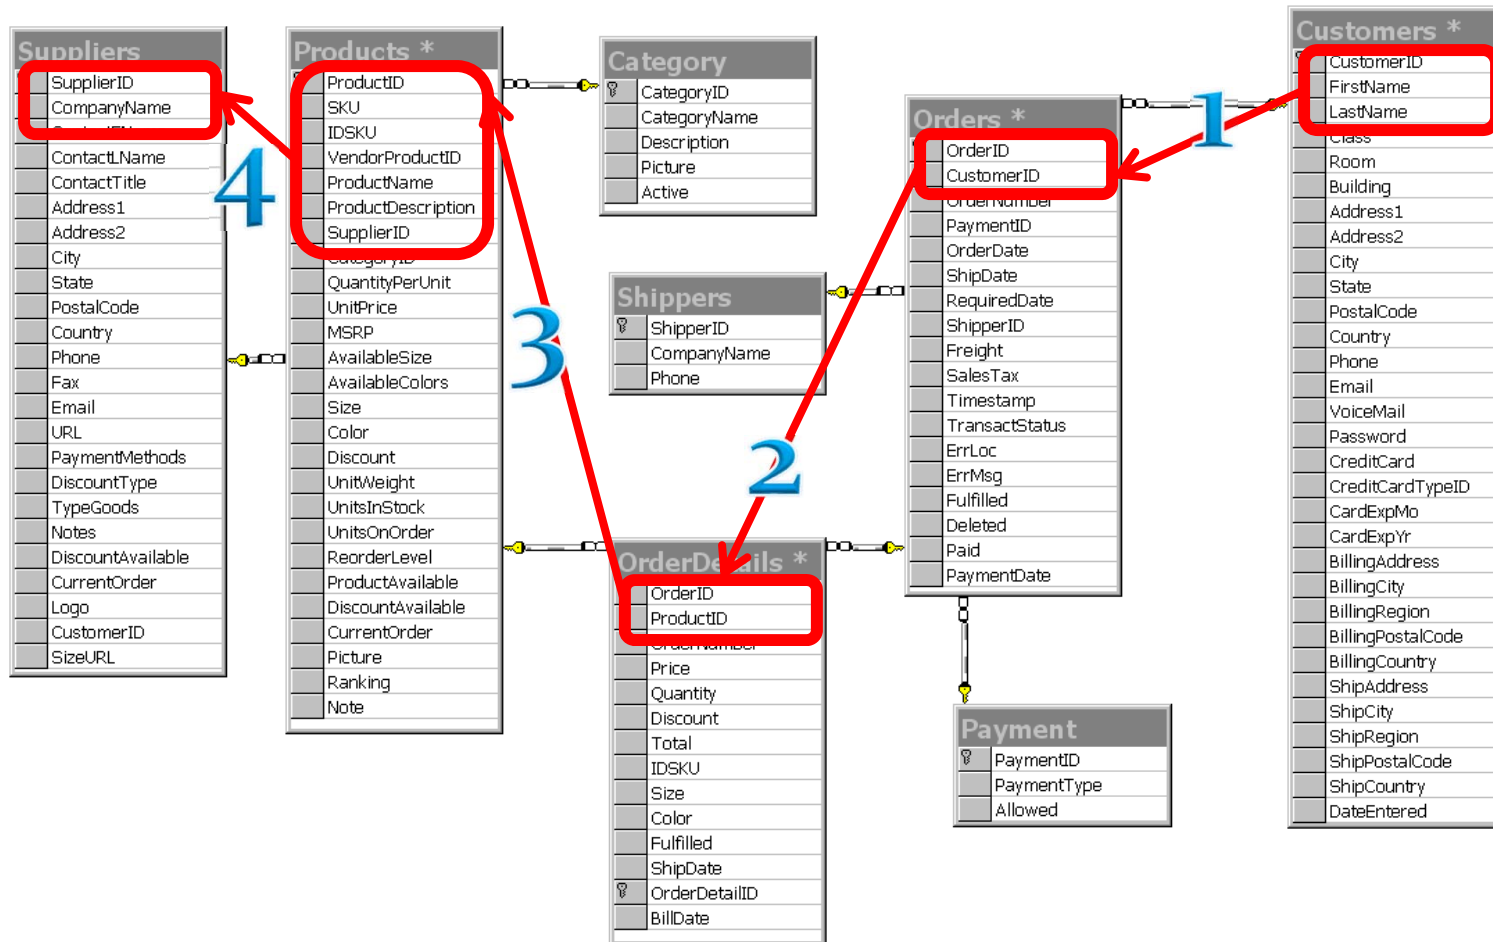

Order Fulfillment: Supplier issue.

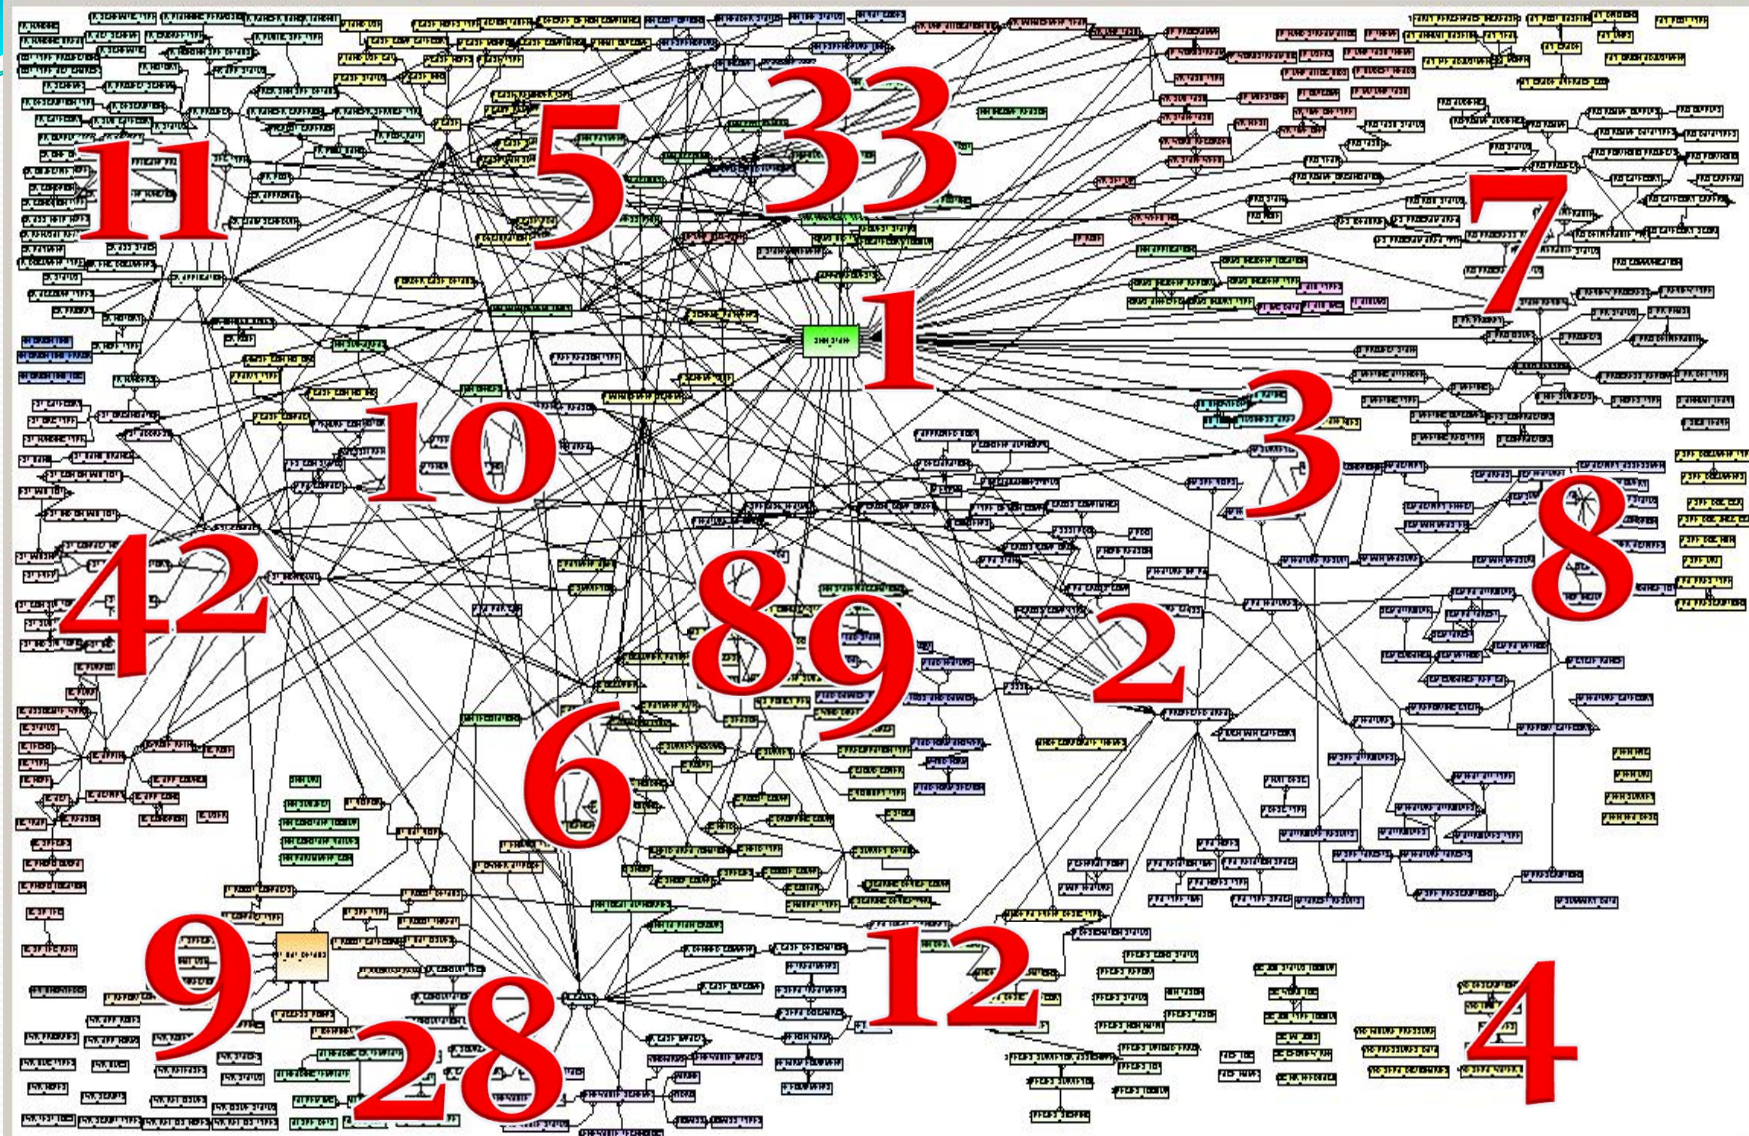

Simple Business Question:

Who was our product supplier?

Small OLTP database

Large OLTP database

Ralph Kimball

Vs.

Bill Inmon

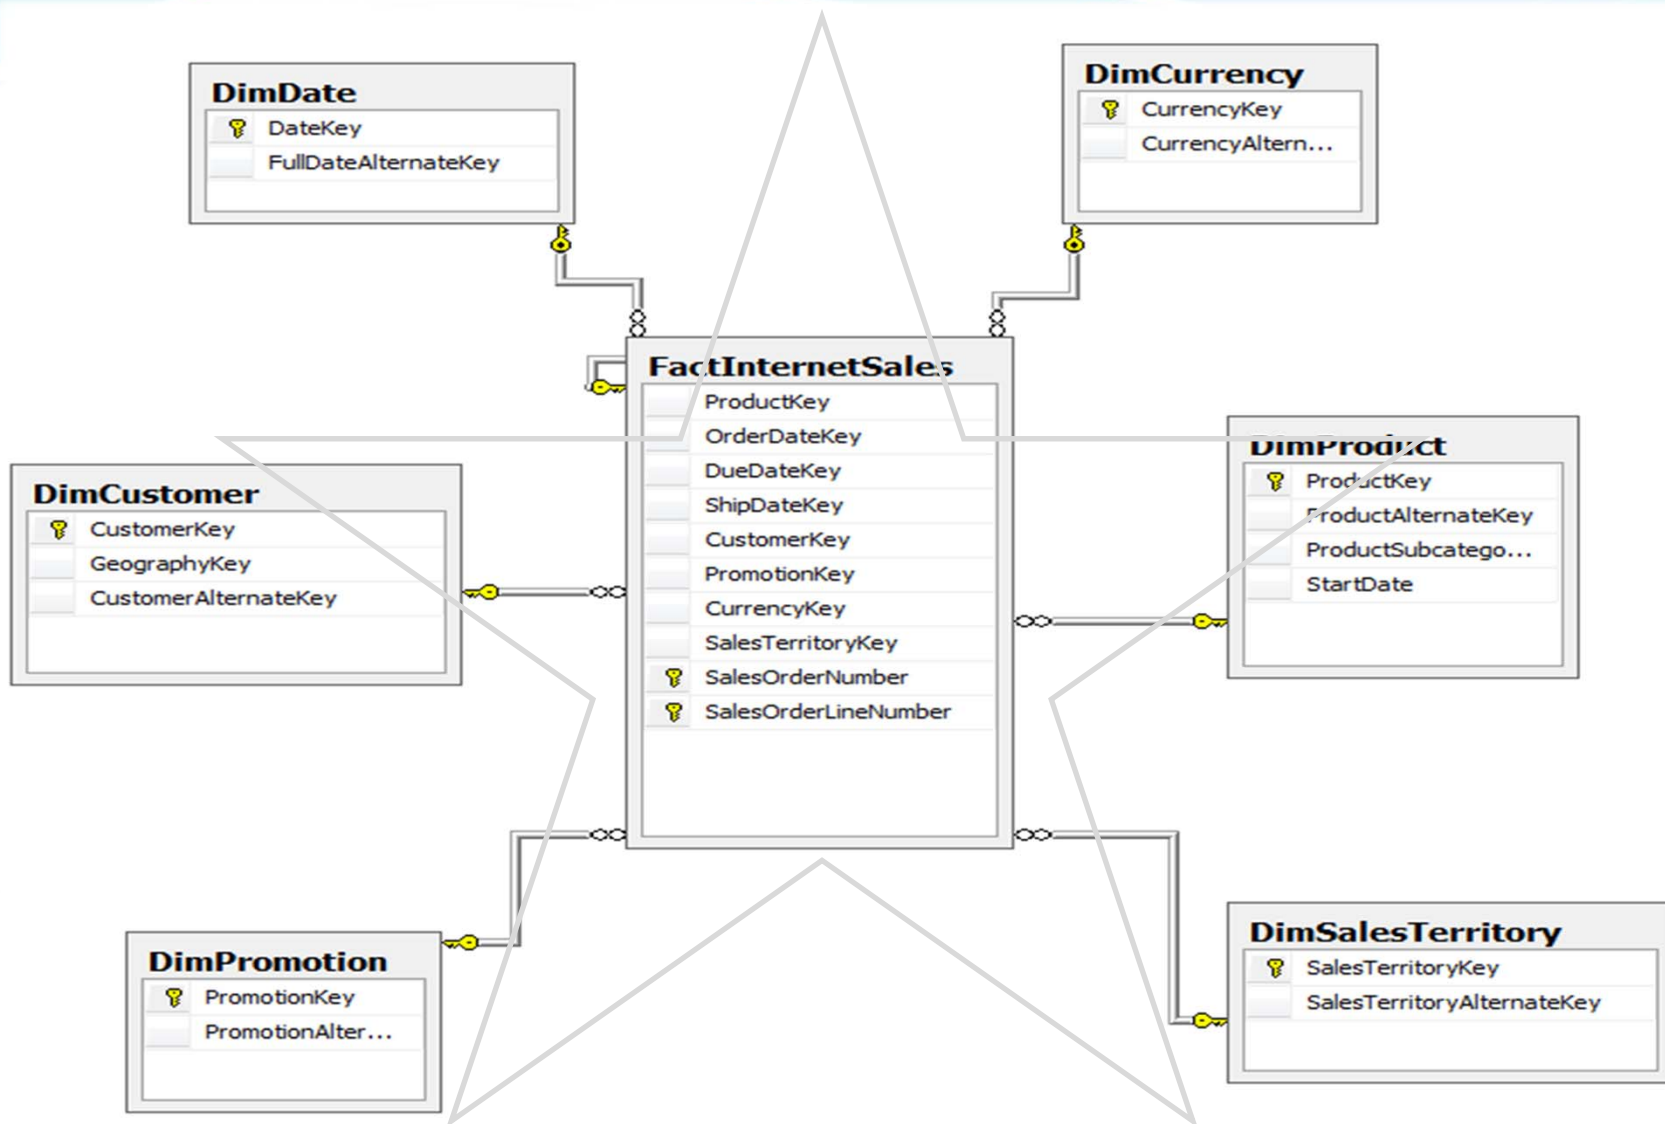

Star Schema

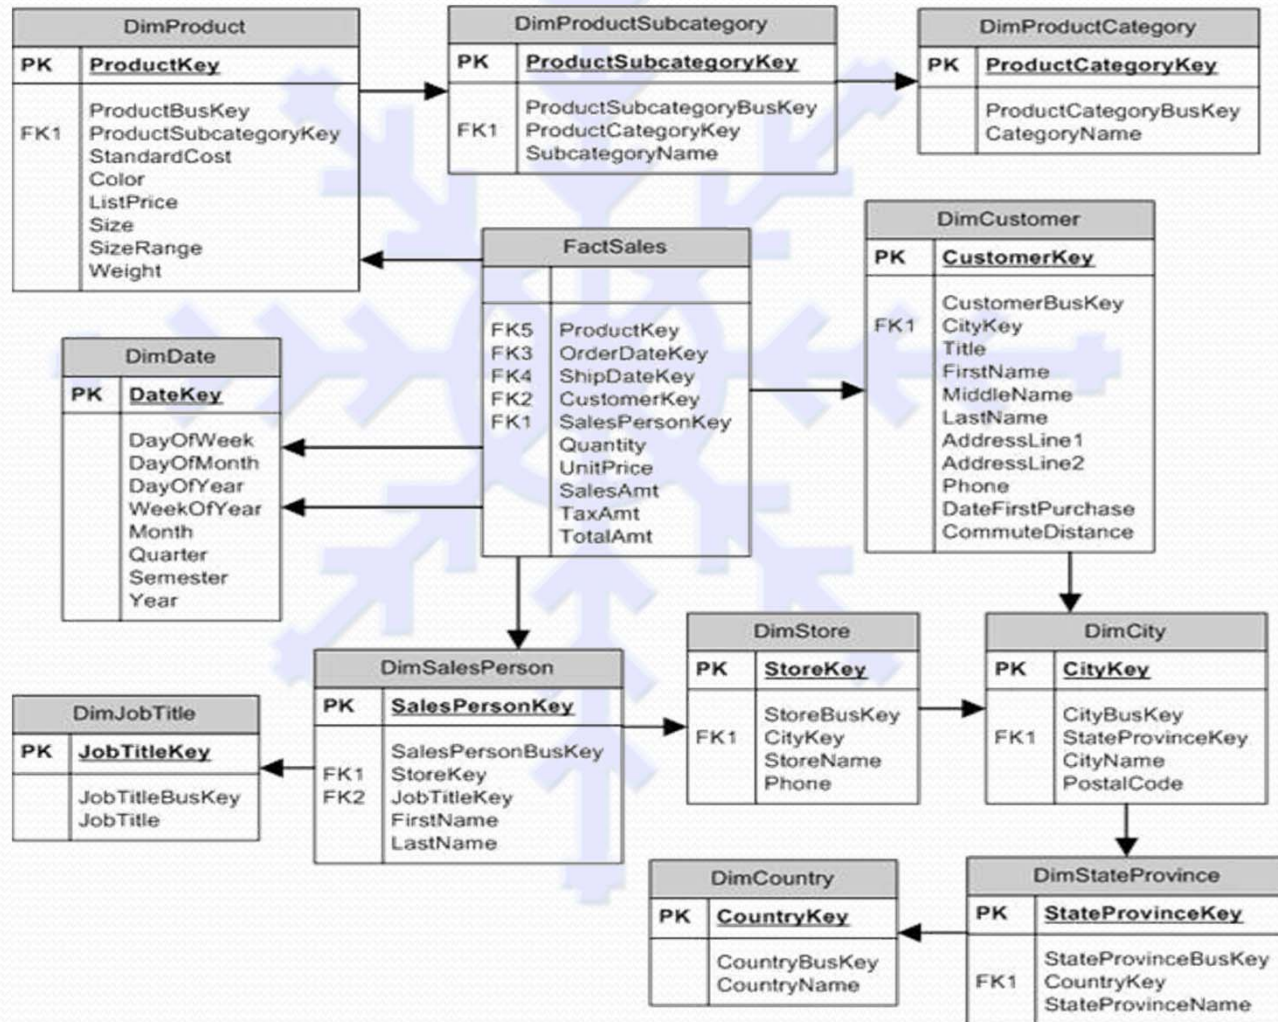

Snowflake Schema

Data Warehouse: Data Model

Data Model: Star Schema

1 to Many to Many

Data Model: Snowflake Schema

Dimensional Modeling

*"The central attraction of the dimensional model of a business is its **simplicity**.... that simplicity is the fundamental key that allows users to **understand** databases, and allows software to navigate databases efficiently."*

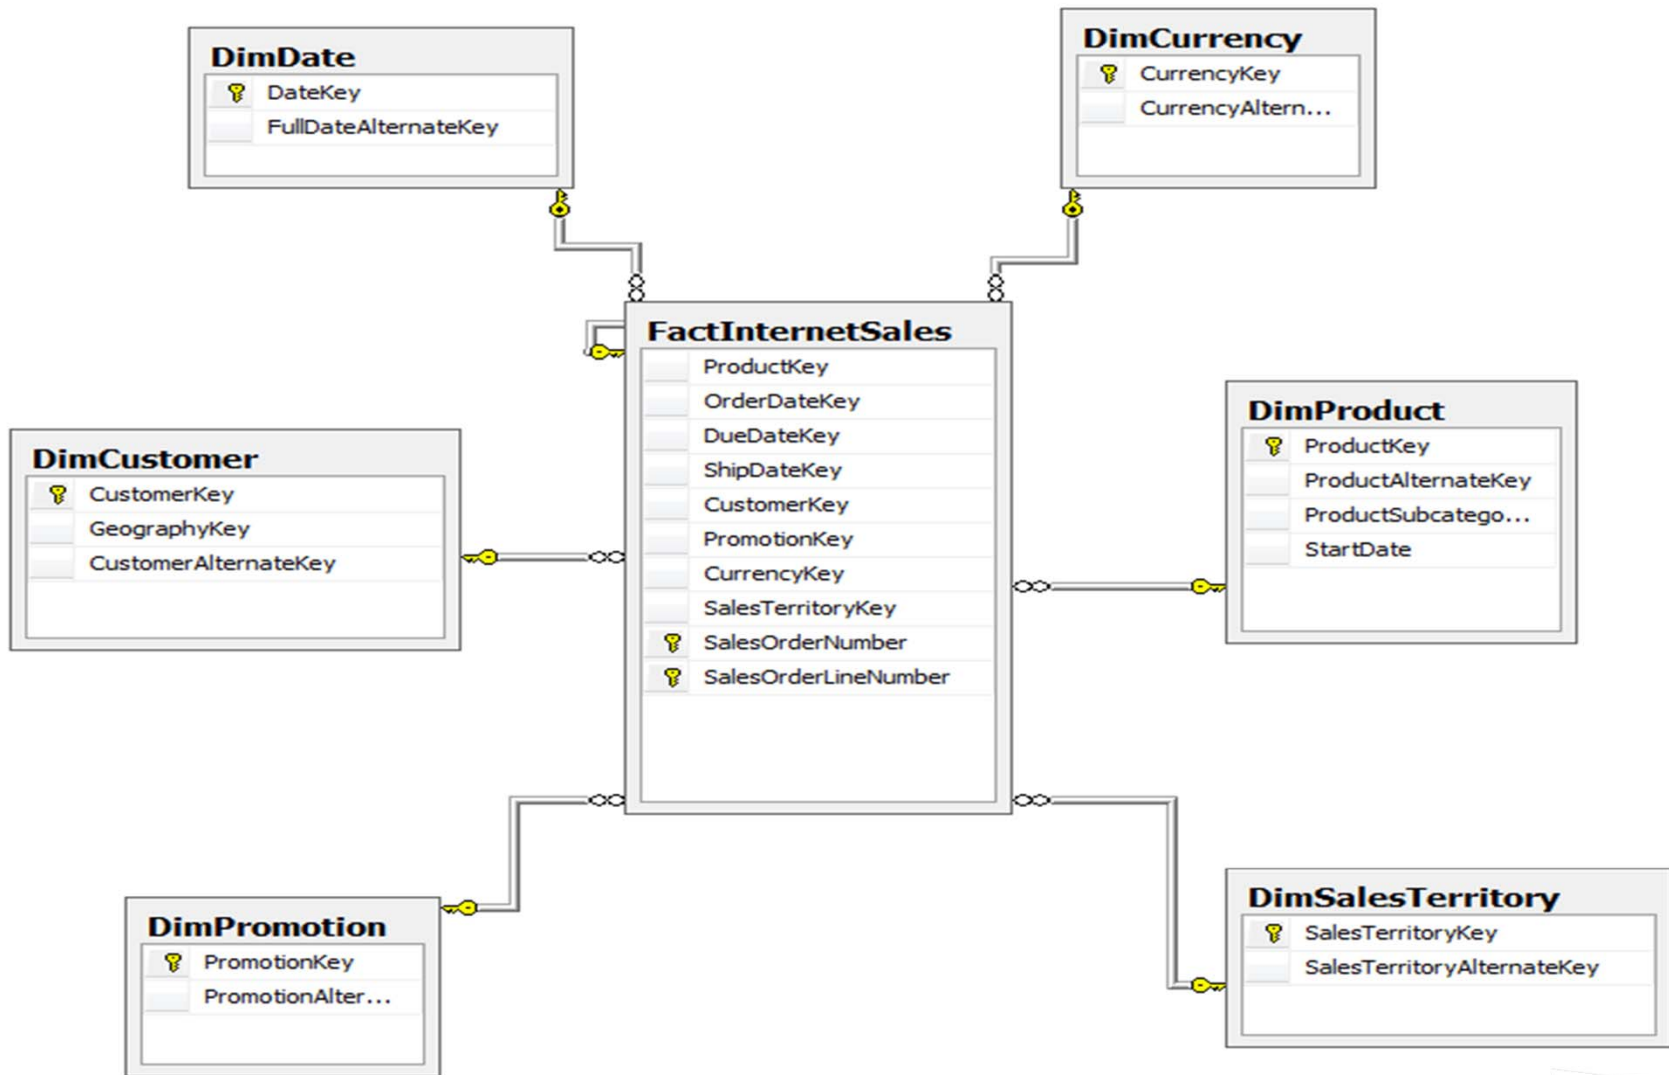

-Ralph Kimball

Dimensional Modeling

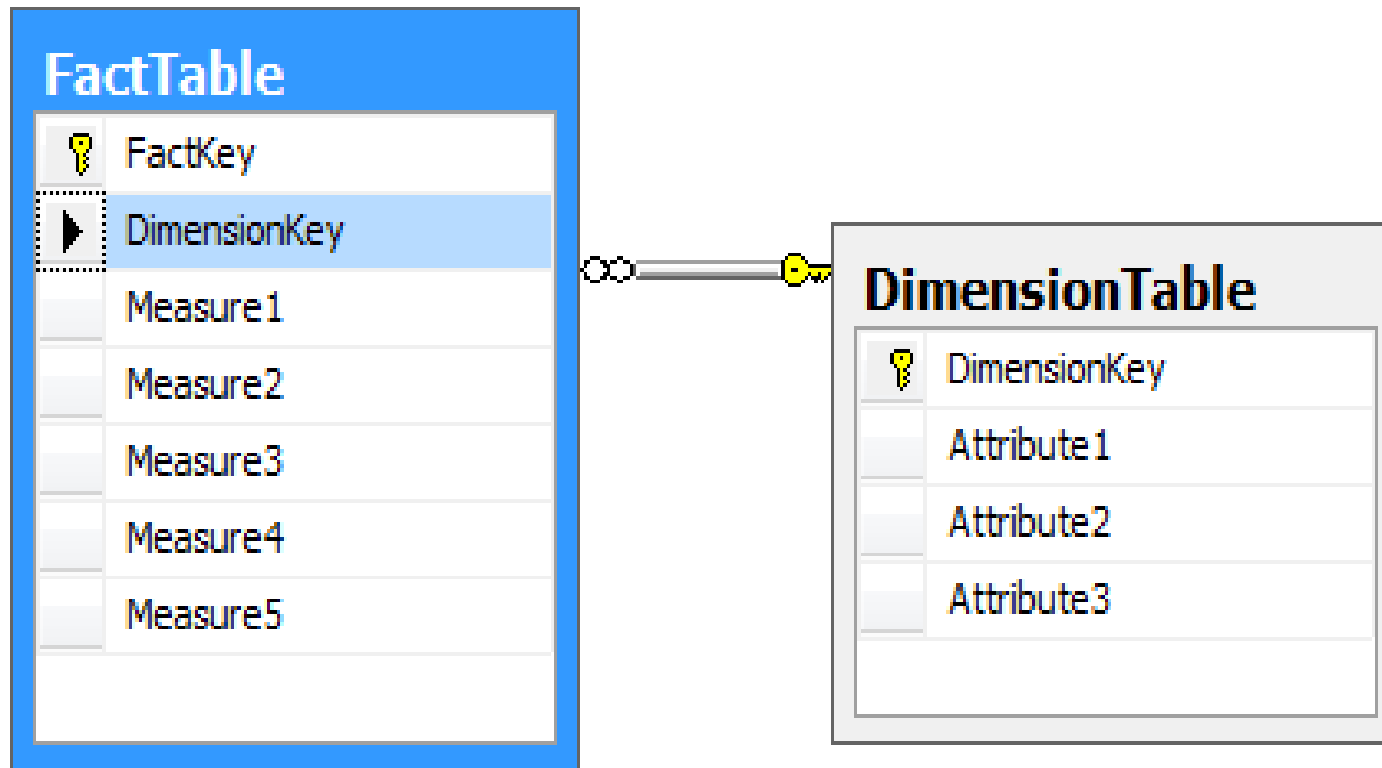

- Logical view of the enterprise
- Shows main entities of the enterprise
- business and relationships between them
- Not tied to a physical database and tables

Main Components

- Dimensions
 - Attributes
 - Hierarchies
- Facts
 - Measures

1 to Many

Data Warehouse: Relationships

Fact Measure

- What the business does → Business Process
- Usually describes an **action** or **event** (verb)

Fact Tables: contain *measure* columns and *dimension* key columns

Measure: numerical values that can be aggregated, semi-aggregated, or non-aggregatable

Dimension: group of attributes that describe a business process

Attribute: characteristics of a dimension member

- Fact Internet Sales
 - Sales Amount
 - Discount Amount
 - Profit
 - Profit Margin
- Dim Customer
 - Name
 - Gender
 - Yearly Income
- Dim Product
 - Color
 - Size

Data Warehouse: Fact & Dimensions

Business Process: Sales

Business Intelligence

“BI results when organizational culture, business processes and technologies are designed and implemented with the goal of improving the strategic and operational decision-making capabilities of a wide range of internal and external stakeholders.”

- International Data Corporation (IDC)

*“BI results when organizational **culture**, business **processes** and **technologies** are designed and implemented with the goal of **improving** the strategic and operational **decision-making** capabilities of a wide range of internal and external **stakeholders**.”*

- International Data Corporation (IDC)

Business Intelligence:

Culture, processes and technologies to improve decision making for stakeholders.

Typical Business Intelligence Lifecycle

What
Business Intelligence
is not.

What it is not...

- Application ➤
- Tool ➤
- Department ➤
- Project ➤
- Report Base ➤
- Archive ➤
- IT Service ➤

What it is...

- Solution
- Suite
- Interdepartmental Team
- Continuous process
- Knowledge Base
- Actionable Information
- Business Asset

What is Business Intelligence?

Why Business Intelligence?

The complaints:

- ***“We need information but all we have is data!”***
[Why Companies Need Business Intelligence](#) by Jose Allan Tans
- ***“Need to make data manageable and actionable in a timely manner”***
[Need for Business Intelligence Grows](#) by Diann Daniel (CIO Magazine)
- ***“Information overload”***

How will BI solve it?

...The Snake Oil selling points:

- *Surface performance & operational efficiencies and deficiencies*
- *Reveal untapped opportunities*
 - *Data Mining*
 - *Forecasting & Trending*
- *Democratization of the data*
- *Decision Support System (DSS)*
- *Dashboards & Balanced Scorecards*
- *Key Performance Indicators (KPIs)*

*But wait there's more,
if you call in the next 10 minutes...*

*Self-Service BI.
(No need for IT)*

...Reactive Manager

- Answer questions
- Solve issues
- Trending
- Make decisions
- Understand your customers
- Report

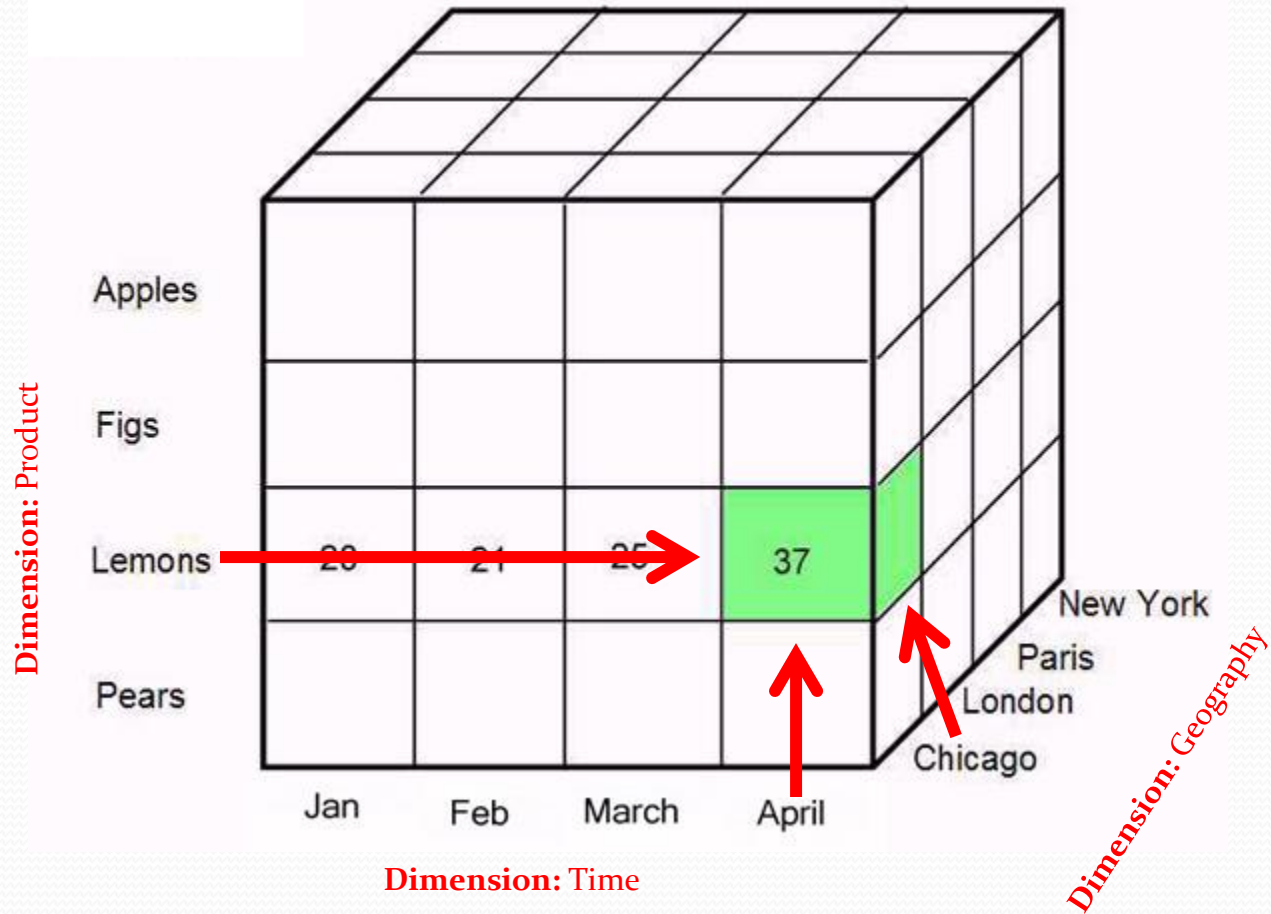

Proactive Manager...

- Propose new questions
- Identify future issues
- Forecasting
- Surface decision points
- Discover potential customers
- Gain insight

The OLAP Cube

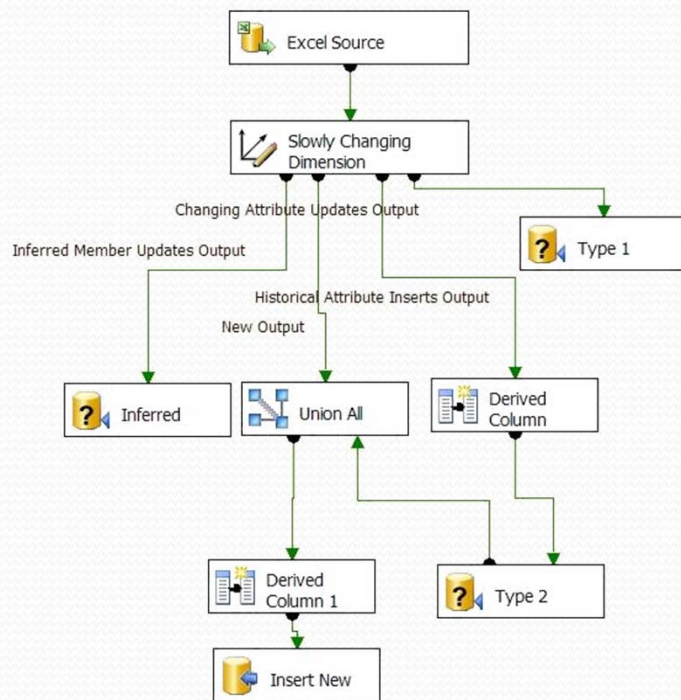

Measure: Units sold

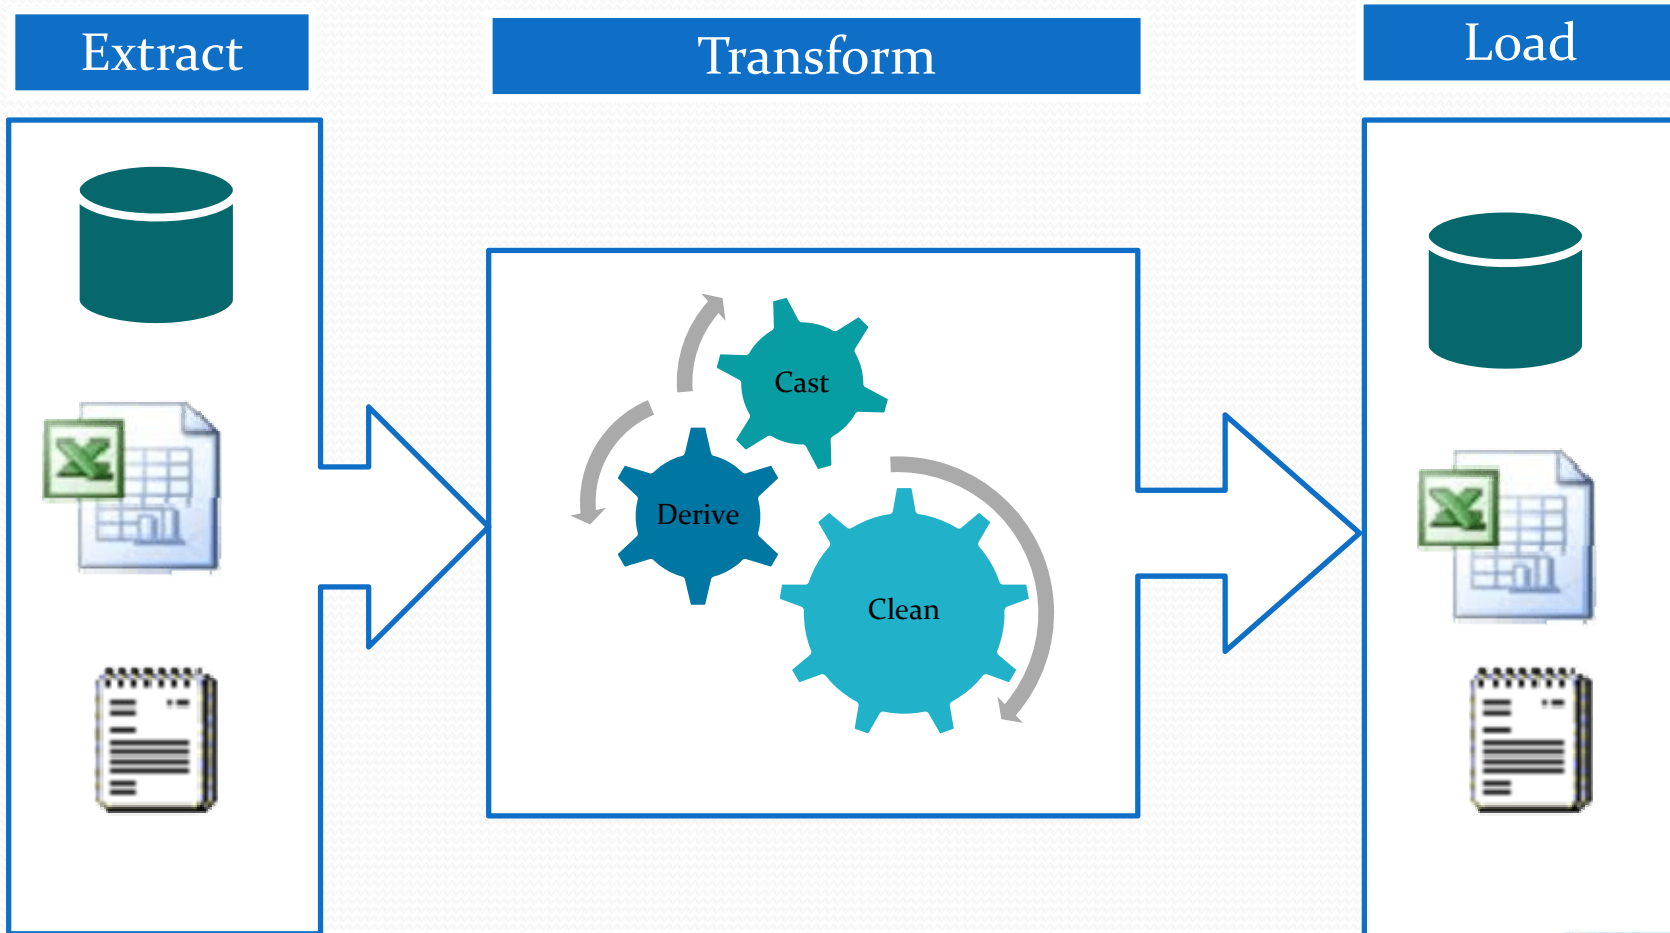

Fact:

37 Lemons were sold during April in our Chicago stores.

SQL Server Integration Services

ETL Process (simplified)

ETL process Mantra

Extracting Data
Transforming Data
Loading Data

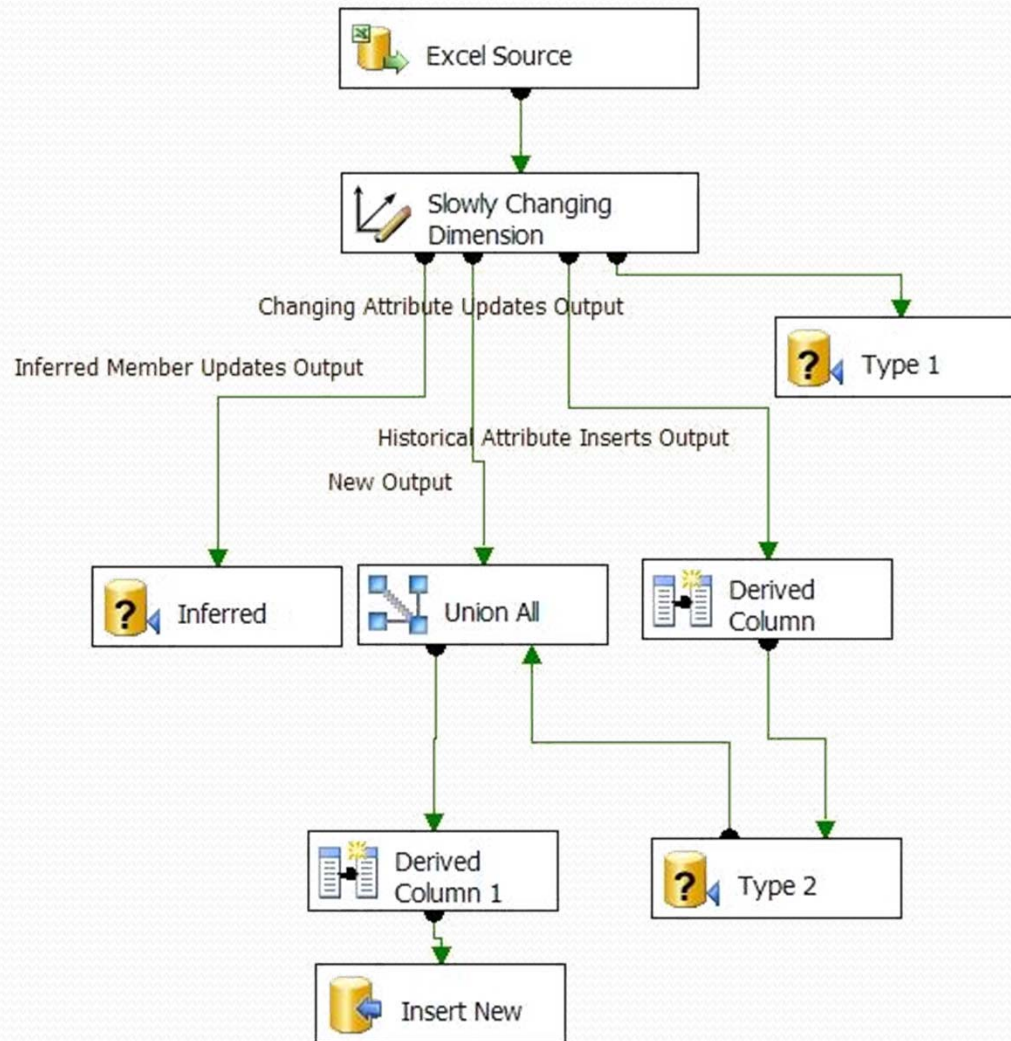

- Fast
- Efficient
- Scalable

SQL Server Reporting Services

The screenshot shows a Microsoft Internet Explorer browser window displaying a report from SQL Server Reporting Services. The report is titled "Product Catalog" and is part of a demo for Adventureworks. The main content area shows a product detail for "Mountain-100", described as a "Top-of-the-line competition mountain bike". An image of a blue mountain bike is displayed. Below the description is a table listing various configurations of the Mountain-100, including product numbers, descriptions, colors, sizes, weights, dealers, and list prices.

Product No.	Product	Color	Size	Weight	Dealer	List Price
BK-M82B-38	Mountain-100 Black, 38	Black	38	20	Call	\$3,374.99
BK-M82B-42	Mountain-100 Black, 42	Black	42	21	Call	\$3,374.99
BK-M82B-48	Mountain-100 Black, 48	Black	48	21	Call	\$3,374.99
BK-M82B-56	Mountain-100 Black, 56	Black	56	22	Call	\$3,374.99
BK-M82B-58	Mountain-100 Black, 58	Black	58	22	Call	\$3,374.99
BK-M82B-60	Mountain-100 Black, 60	Black	60	22	Call	\$3,374.99
BK-M82B-62	Mountain-100 Black, 62	Black	62	22	Call	\$3,374.99
BK-M82R-40	Mountain-100 Red, 40	Red	40	20	Call	\$3,374.99
BK-M82R-44	Mountain-100 Red, 44	Red	44	21	Call	\$3,374.99
